

ANZIC Post cruise Funding. 12-month report.

Proponent:

Project Title:

Expedition #:

Research Office Contact details:

Date of Report:

Please provide a brief report on your progress. This report will be assessed by the Chair of the ANZIC Science Committee, and will be used along with your 1st six monthly report to ascertain satisfactory progress and continued support of ANZIC funding.

When did the samples arrive at your facility?

Has sample analysis begun? Please elaborate on progress.

Have you encountered any significant delays (including potential future delays) in your analysis?

Outline any initial results you have obtained.

Do the objectives or milestones of your research need to be modified? If so, state the original and the revised versions detailing the reasons for change.

Please indicate which public data repository/ies you expect the data to be lodged?

Do you have any students working on this material? If yes, please detail their name, level of enrolment (3rd yr project, Master, PhD etc.) and the title/focus of that study.

Have you produced any other outputs (e.g. presentations, conference presentations, other press or publication coverage)? Please provide details of those outputs.

Any other comments or issues?

Please remember: Acknowledgements

Please see our website for details on suitable presentation, print and database citations (<https://iodp.org.au/for-scientists/citation-and-acknowledgements/>).

When publishing you are required to acknowledge funding from the **Australian IODP Office** and include “**scientific ocean drilling**” or an equivalent phrase in the title or abstract of your publications. The latter helps us in digital compilations of the Australian performance within ocean drilling, clearly important when we make a case for further funding. If a suitable phrase could be included in key words that would also help. When discussing IODP-based science in public forums or with the press, please make a point of mentioning that ***your results depend on IODP's scientific ocean drilling and Australian/NZ support of this program.***

Please contact the ANZIC Office for the appropriate template.
